

Prishchepchuk Gleb

☎ +7-919-740-64-11 | ✉ Gleb.Prishchepchuk@skoltech.ru | 🌐 Glebus_trzrt

Education

2026 – present **Skolkovo Institute of Science and Technology (Skoltech)**, Master of Science in Materials Science and Technology of Materials

2025 – 2026 **Moscow Institute of Physics and Technology (MIPT)**, School of Electronics, Photonics and Molecular Physics Master's program in Applied Mathematics and Physics Specialization: Physics of Advanced Technologies — Electronics and Quantum Technologies

2021 – 2025 **Moscow Institute of Physics and Technology (MIPT)**, School of Electronics, Photonics and Molecular Physics Bachelor's degree in Applied Mathematics and Physics

Experience

2025 – Present **Molecular Electronics Research Institute (JSC MERI)**— Junior Researcher Department of Process Development, Laboratory of Mathematical Modeling of Technological Processes.

2024 – 2025 **Molecular Electronics Research Institute (JSC MERI)** — Technician, Scientific-practical group on electronic technologies. Project: "Study of the influence of design and technological factors on the switching endurance of a FeRAM storage element based on hafnium oxide" — research within the Advanced Research Foundation (ARF) project "Magnit".

Skills

1. Programming languages: Python, C++, Bash
2. Libraries: PyTorch, NumPy, pandas, Matplotlib, Seaborn, SciPy, scikit-learn, ASE, Phonopy
3. Software: LAMMPS, OVITO, Atomsk, TCAD, SolidWorks
4. Languages: Russian (Native), English (Advanced)

Conferences

- Poster: G.A. Prishchepchuk. "Investigation of the Oxidation Process of Silicon Nitride Thin Films Deposited by Low-Temperature Plasma-Enhanced Atomic Layer Deposition". School of Young Scientists 2026, Section No. 3 "Technological processes in microelectronics." Abstracts of the scientific conference "Electronic Components and Microelectronic Modules." Russian forum "Microelectronics 2026" (September 2026) — Sirius University. — 242 pp.
- Presentation: G.A. Prishchepchuk. "A study of a resistive memory storage element based on silicon nitride, formed using the atomic layer deposition method." Microelectronics and Informatics — 2026, Section No. 4 "Equipment and technology of semiconductor devices and ICs". Abstracts of 33rd All-Russian Intercollegiate Scientific and Technical Conference for Students, Postgraduates, and Young Scientists with International Participation (April 2026) — Zelenograd. — 119 pp.
- Presentation: G.A. Prishchepchuk, P.S. Zakharov, K.S. Bykovsky. "Study of the effect of a titanium sublayer and the duration of final annealing on the switching endurance of a FeRAM storage element based on hafnium oxide." School of Young Scientists 2025, Section No. 9 "Physics of Micro- and

Nanoscale Devices.” Abstracts of the scientific conference “Electronic Components and Microelectronic Modules.” Russian forum “Microelectronics 2025” (September 2025) — Sirius University. — 449 pp.

- Presentation: G.A. Prishchepchuk, P.S. Zakharov, K.S. Bykovsky. “Study of the influence of design and technological factors on the switching endurance of a FeRAM storage element based on hafnium oxide.” Proceedings of the 67th All-Russian Scientific Conference of MIPT (Dolgoprudny, March 30 – April 5, 2025) — MIPT. — 125 pp.

Additional information

I participated in the scientific workshop “Computational Methods in Materials Science and Chemistry 2025,” a course in Classical Molecular Dynamics.
